This staffing plan may fluctuate daily due to staggered shifts, patient census, acuity, skill mix, case mix, specialized or intensive equipment, and one-to-one patient observation. Nursing leadership may modify staffing plans in the case of unforeseeable emergency circumstances. Such as, but not limited to, any officially declared national, state, or municipal emergency, when a general hospital disaster plan is activated, or unforeseen disaster or other catastrophic event that immediately affects or increases the need for health care services. On-call guidelines, specific to unit and department.
