

Buprenorphine Assistance Program **BUPE-AP**

BUPE-AP covers the cost of buprenorphine products indicated to treat opioid use disorder for persons who are uninsured or underinsured and not able to cover the cost of these medications. This program covers copays and coordinates with patients' insurers to cover any other out-of-pocket costs.

To be eligible for BUPE-AP, people need to be enrolled in the program. To find out if a patient qualifies for the program and where they can be enrolled, call 800-542-2437 or 1-844-682-4058.

The BUPE-AP program is available at all AIDS Drug Assistance Program (ADAP) participating pharmacies. Pharmacies must submit claims electronically, using NCPDP version D.0 including the COB segment of the transaction, if appropriate. The Point-of-Sale system will verify the participant's eligibility and specific drug coverage as well as process and adjudicate claims. Claims may be submitted using the payer information on the back of this card.
