

## To Parents, Foster Parents, and Other Caregivers

Raising a child is a very rewarding and important job. However, it is not easy or simple, especially when your child has a life-long health condition like HIV. Please know that you and your family are not alone. Many families are living with HIV. **Caring for Children with Special Needs** is designed to give parents, foster parents, and other caregivers information and support to meet the challenges of raising children with HIV.

Even though there is still no cure for HIV, medical care and treatments have come a long way. Hope for the future continues to grow as more and more treatments are approved. With love, support, and health care, children with HIV are living healthier and longer lives.
