

NEW YORK

AIDS Adult Day Health Care Programs

AIDS Adult Day Health Care Programs provide a comprehensive range of services in a community-based, non-institutional setting. General medical care including treatment adherence support, nursing care, rehabilitative services, nutritional services, case management, HIV risk reduction, substance abuse, and mental health services are among the services provided within this day program service model.

Community Outreach And Linkage To Care For HIV Infected Minority Population

As part of the Minority AIDS Initiative, local service organizations provide outreach and education to minority communities; help people with HIV to enroll in programs that pay for HIV medications, medical care and health insurance premiums; and connect them with medical and supportive service providers for a full range of HIV/AIDS care. The organizations provide in-person assistance to enroll in the HIV Uninsured Care Programs (ADAP/ADAP Plus/APIC) as well as more complete health coverage programs such as Medicaid, Medicare, or private insurance through the Marketplace/Exchange: New York State of Health. The ADAP Plus Insurance Continuation (APIC) program can pay the insurance premiums for cost-effective insurance policies, including COBRA continuation coverage for people who lost their jobs or those policies purchased through the New York State of Health.

Harm Reduction

Individual- and group-level interventions (single-session and/or multiple-session) that address harms related to substance use—particularly the risk of HIV/STD/Hepatitis C transmission from unsafe drug-using and/or unsafe sexual behaviors. Interventions combine client-centered risk reduction education and counseling to help drug users recognize the consequences of substance use and set achievable goals toward positive behavior change. Referrals and navigation to substance use treatment and other supportive services are provided as needed.

HIV/STD/HCV Prevention Education/Risk Reduction Services

Health education and risk reduction education and/or counseling services are provided to individuals and/or groups and range from targeted outreach to prevention counseling to group interventions to broad community level interventions (CLI). Individual-level interventions (ILI) provide individualized health communication, health education, and risk reduction counseling to assist clients in creating plans for individual behavior change and making ongoing appraisals of their own behavior. These interventions may consist of one or multiple sessions. Group-level interventions (GLI) may include peer education and support to promote and reinforce safer behaviors. Prevention interventions delivered to groups may be single or multiple sessions, and often provide interpersonal skills training to negotiate and sustain appropriate behavior change. CLIs seek to reduce risk behaviors by changing attitudes, norms, and practices of community members, and may include a combination of intervention types (e.g., outreach, health communication, public information) or units of delivery (e.g., individual, group, community)

Legal Supportive Services For Families

Legal supportive services programs provide assistance for HIV affected families with dependent children to make decisions focused on future care and custody plans. Programs help HIV positive parents identify potential caregivers or guardians for their dependent children, help with disclosure of HIV status, grief and bereavement services, transitional services to stabilize newly blended families following parental incapacitation as well as short term supportive counseling to assist families with these issues. Legal supportive providers work directly with legal service providers to ensure families can make their care and custody plan final and address any legal barriers during the future care and custody planning process.

Medical Care - Designated AIDS Centers

Designated AIDS Centers (DACs) are State-certified, hospital-based programs that serve as the center of a continuum of hospital and community-based case management for people with HIV and AIDS. DACs with pediatric and obstetrical departments also provide specialized HIV care to infants, children and pregnant women. HIV-specific care standards developed for and used by DACs are intended to ensure uniformly high quality care.

Syringe Exchange

Provides new, sterile syringes without a prescription to active injection drug users, steroid and hormone users and others who inject substances to prevent transmission or acquisition of blood borne diseases. Provision of syringes includes the offer of short counseling on various safer injection practices, disposal and referral to needed services. Please call the syringe exchange program before visiting because the days and hours of operations may vary by location.

Treatment Adherence - Medication Support

These programs are funded to integrate treatment adherence services into the continuum of HIV primary care. Each program implements strategies to promote adherence to HAART through a client-centered approach. Members of the health care team work in concert with consumers to develop, implement, and evaluate tools and skills-building activities to increase and sustain adherence to therapy. One of the fundamental objectives of the Treatment Adherence Initiative is to foster a comprehensive approach to assessing and assisting consumers at risk for non-adherence, and promote consumer and provider collaboration to develop consumer-specific strategies that lead to sustained treatment adherence.
