

Health Planning Committee Report

Public Health and Health Planning Committee

December 8, 2017

End Stage Renal Dialysis Need Review Considerations

- documented evidence of the unduplicated number of ESRD patients on waiting lists;
- the location of the proposed facility and documented unreasonable travel times for treatment;
- specialty services such as home peritoneal dialysis training offered by the applicant but not offered at surrounding facilities;

End Stage Renal Dialysis Need Review Considerations

- extent to which the application addresses medically underserved populations;
- patient migration patterns;
- the applicant's quality of care metrics;
- quality complaints or low CMS ratings for area facilities;
- recommendations from the local health systems;

End Stage Renal Dialysis Need Review Considerations

- the extent to which the applicant's policies and procedures include efforts to coordinate with other local healthcare providers in the care of its ESRD patients;
- whether the proposed stations would provide improvements or innovations in the delivery of health services and serve to promote quality assurance and cost effectiveness;
- DSRIP participation or other affiliations.
