Introduction

This report presents the findings of research conducted among the Millennium Collaborative Care (Millennium) PPS facilities by the Western New York Rural Area Health Education Center (R-AHEC) as part of the DSRIP initiative.

In 2015, Millennium contracted R-AHEC to assist in completing DSRIP Workforce Implementation Plan. The same year, R-AHEC and Millennium established a Workforce Workgroup comprised of industry stakeholders to help achieve milestones of the DSRIP Workforce Implementation Plan.

One of the key actions of the Implementation plan was to undertake an analysis of the gap between the Current and Target Workforce State identifying specific retraining, redeployment, and new hire needs. Known as the Workforce Gap Analysis, this research was identified as critical by R-AHEC and industry stakeholders for future workforce planning and development, in light of all reforms brought by DSRIP, in all its 8 counties of Western New York. Simply stated, the Gap Analysis is a contrast between what *is* and what *should be*.

Methodology

The methodology included an assessment of current staffing patterns and qualifications at partner facilities, gathered through organizational assessments and project manager interviews, resulting in the creation of a Current Workforce survey and Target Workforce survey. Efforts also included a review of available online U.S. healthcare workforce gap literature.

The assessment process began during the Fall of 2015 when R-AHEC staff met with Millennium Project Managers to evaluate anticipated workforce staffing and training needs.

The process continued between February 1, 2016 and March 30, 2016 as R-AHEC staff conducted interviews with Millennium's partner facilities to gather site-specific workforce information. Current Workforce Survey results were collected via e-mail from October 2015 until the end of March 2016. Collected data was aggregated into a report and attached to this research.

Findings

Current Workforce Survey

One hundred and twenty five Millennium partners, representing nine DSRIP facility types, were invited to participate in this survey in October 2015. The overall response rate to this survey was 80.8%. The information contained in the report depends completely on the accuracy of information reported by each participating facility. Based on the provided information, Millennium engages over 34,158 healthcare workers across these facility types:

Article 16 Clinics (OPWDD), Article 28 Diagnostic and Treatment Centers, Government Agency, Home Care Agency, Inpatient, Non-licensed CBO, Nursing Home/SNF, Article 31/Article 32 Outpatient Behavioral Health, and Private Provider Practice. Sixty six percent or 22,391 of the surveyed workforce are full time employees, while 26% or 8,921 are part time and 8% or 2,846 are on a per diem schedule.

According to a 2010 census there are 1,544,794 residents in the 8 counties of Western New York. The reported Millennium's healthcare workforce is 2.2% of this population. The Current Workforce survey shows a low number of Care Coordinators, Health Educators, Nurse Practitioners, Physicians, Physician Assistants, and Social Workers employed to serve this population to achieve the goals of DSRIP (to reduce avoidable use of Emergency Department by 25% over the course of five years). This finding corresponds with the nationwide shortage of physicians and nurses¹. Rural residents of Western New York are especially vulnerable to these shortages as they might not have any primary care in their area and will seek help from Emergency Departments should there be any healthcare issues. Five of 8 counties of Western New York (Allegany, Orleans, Chautauqua, Cattaraugus, and Wyoming) are considered to be predominantly rural.

Target Workforce Survey

R-AHEC invited 124 Millennium partners to participate in this survey. Of the 124 partners, 52.4% of them were able to schedule personal discussions with R-AHEC staff. Partnering employers provided information regarding their present staff, general shortages, and anticipated need for trainings. In many cases, the partners were unable to answer the questions asked of them because they haven't engaged all projects. In addition to personal discussions with partner facilities, R-AHEC interviewed project managers to add their information to the Target Workforce report.

Facilities struggled to answer the question of how many staff members will be redeployed, retrained or newly hired for DSRIP projects. Currently they are trying to fill their general shortages of Community Health Workers, Registered Nurses, LPNs, CNAs, CMAs, Care Coordinators, Medical Assistants, Licensed Clinical Social Workers, Case Managers, Primary Care Physicians, Dentists and other positions.

Staff Impact (Baseline)

Based on the Organizational Application and the calculations of John Taylor, the Executive Director of Development, Primary Care Research Institute at the University of Buffalo, Millennium expects that 1.7% (211) of an identified 12,644 health workforce staff across the partner facilities will be impacted by redeployment or retraining in either Inpatient, ED, or SNF settings. Using Cost Reports to consistently extract information for every hospital in the Millennium PPS, it is determined the PPS inpatient occupancy rate is 72%, which means, on average, there are 490 beds (out of 1,726 licensed beds) not in use. Presumably the deactivation of unused beds that are largely unstaffed (about 390) would not have workforce reduction implications, especially if reuse of facilities were possible using redeployed staff.

Inpatient workforce impact: Millennium inpatient facilities have an estimated 3,600 Medicaid preventable admissions annually (including preventable readmissions as well as adult and pediatric avoidable admissions). A 25% reduction over five years would be a reduction of 900 admissions per year. Using FTE per admission statistics from the Cost Reports for each facility, we estimate this would impact a total of 117 existing FTEs across the 10 Millennium acute care hospital settings. The FTE impact by category of worker would be approximately: 30 RNs, 6 LPNs, 10 CNAs, 28 Medical Assistants, 18 Therapists (MSWs etc.), 14 Medical Coders, and 11 other allied health professions.

Hospital ED workforce impact: The Community Needs Assessment (CNA) estimated that the 12 Millennium ED facilities have about 71,000 Medicaid preventable ED visits annually. A 25% reduction over five years would be a reduction of 17,500 ED visits per year. Using FTE per visit statistics from the Cost Reports for each facility, we estimate that this would impact a total of 32 existing FTEs across the 12 MCC ED settings. The FTE impact by category of worker would be approximately: 8 RNs, 2 LPNs, 3 CNAs, 7 Medical Assistants, 5 Therapists (MSWs etc.), 4 Medical Coders, and 3 Other Allied Health Professions. **SNF workforce impact**: There are 41 nursing home facilities in the Millennium PPS. Projected estimates of WNY public need for SNF beds indicate an excess of 275 beds (out of 5,607) in these facilities. Presumably, deactivation of unused beds that are largely unstaffed (about 200) would not have great workforce reduction implications, especially if reuse of facilities were possible using redeployed staff. Assuming some excess beds are unstaffed, the CNA estimated this would impact 62 existing FTEs across the 41 Millennium SNF settings. The FTE impact by category of worker would be approximately: 6 RNs, 13 LPNs, 27 CNAs, 10 Therapists, and 6 other allied health professions.

During the application process Millennium anticipated 251 new hires. At the end of DY1 Millennium partner facilities reported their numbers of new hires for DY1 were higher than projected, which brought the overall anticipated number to 268. The Millennium Workforce Staffing Impact chart (see Appendix A) shows how these numbers will break down by facility type and specific job titles.

Workforce Implication	Percent of Employees Impacted
Redeployment	25%
Retrain	20%
New Hire	55%

Specific facility names are not mentioned as this is just a projection of what may be needed across facility types.

Organizational Assessments

R-AHEC invited 124 Millennium-partnered facilities to speak with a representative in-person, regarding DSRIP projects and anticipated changes to facility staff. Of that number, R-AHEC employees scheduled 65 personal discussions with designated staff for a response rate of 52.4%. Interviews were held at the facility's location between February 1, 2016 and March 30, 2016. The interviewed facilities represent nine DSRIP facility types: Clinic OPWDD (Article 16), Diagnostic and Treatment Center (Article 28), Home Care Agency, Hospital Outpatient Clinic (Article 28), Inpatient, Non-licensed CBO, Nursing Home/SNF, Outpatient Behavioral Health (Articles 31 & 32), Private Provider Practice. These facilities are spread out across eight Western New York counties: Allegany, Cattaraugus, Chautauqua, Erie, Genesee, Niagara, Orleans, and Wyoming with an additional facility located in Chemung County. The majority of surveyed facilities serve rural populations.

During the assessment interviews, partner facilities reported shortage of nursing staff (RNs, LPNs, CNAs and CMAs) as well as personal care aids, community health workers, care coordinators, care managers, social workers, primary care physicians, physiatrists, psychologists and other allied health employees.

A number of interviewed facilities reported that they are in need of bilingual staff. Many of these facilities serve the refugee population with a diverse patient base that speaks 27 different

languages. Presently, several facilities are using expensive translation services that do not offer all the dialects needed. Additionally, these facilities reported serving the Seneca, Amish, Mennonite, and other minority populations, each with unique cultural, language and socioeconomic requirements.

Upon completion of the season of interviews, R-AHEC created a list of the most frequently reported job titles and, through research, created a database of required New York State licenses and certifications (see Appendix B).

Resources Roadmap

For facilities to be successful in redeploying, retraining and rehiring, collaboration has to be made in a variety of ways. Millennium will be a resource for these facilities to turn to for support as they implement their DSRIP projects and will provide support and direction in the following categories:

Funding

First and foremost, facilities need to look to their own budgets for funding in regards to training. Secondly, they can access monies from grants, scholarships, and perhaps their unions. Finally, facilities can look to Millennium as an option for relief in financial support of providing trainings for their employees.

Manpower

Facility needs will change as DSRIP continues to be implemented. Manpower is and will continue to be key. With an aging society, attrition will affect retraining/redeployment in a natural/positive manner. This effect will result in the need for new hires and basic onboard training. Locating qualified staff who are seeking positions in rural, underserved areas, will become the challenge.

Training

Facilities that are unionized may have trainings available through their unions. Outside of a hospital setting, employers may also find training through their unions if they belong to one. If a facility or office is looking for a database of trainings, they may contact WNY Rural AHEC who is compiling trainings and various curriculums offered in the Western New York area. A Millennium subcommittee is in the process of vetting quality programs and if employers would like to provide their input regarding trainings, they can contact WNY Rural AHEC and ask to serve on the committee. The Community Health Worker Network of Buffalo charges facilities to participate in a four day program and individuals are given a certificate at the completion of the program. Other projects, such as INTERACT, have created a partnership with Florida Atlantic University because of their train the trainer program. Individuals from the facility travel to designated locations and provide trainings in person. If a facility is large enough, a Human Resource Director or other similar position, may be needed to circumvent individuals to the particular trainings they need.

Methods

These goals may be achieved through various methods of provided trainings. Taking into consideration the fact that healthcare employees work long shifts, online trainings are a great solution to save employees' time and travel. On-site and off-site trainings are also available. Many training facilities are exploring unique ways of training such as lunch time learning and hybrid courses which include on-line and on-site instruction.

Metrics

Progress of this implementation plan will be measured by surveys, continued organizational assessments, and customer service evaluations.

Partnerships

In consideration of these goals, Millennium is building partnerships with community-based organizations, colleges, BOCES, CHW networks, rural health networks, area health education centers, and various other institutes which will support project implementation.

Identification of Gaps

The gaps identified in this report highlight specific areas of improvement that must be addressed to move beyond the current state and toward achievement of the goals of Millennium's Implementation Plan. Gaps have been categorized into two groups, current and anticipated gaps indicating short and long term considerations.

Current Gaps

Shortages – Workforce Gaps

Based on the information collected from the organizational assessments, partner facilities reported experiencing the following shortages: RNs, LPNs, CNAs, Nurse Managers, Personal Care Aids, Community Health Workers, Care Coordinators, Care Managers, Social Workers, Primary Care Physicians, Physiatrists, Psychologists and others allied health positions. Among all reported job titles, Primary Care Physicians are currently the most needed position.

This is consistent with the Healthcare Association of New York States (HANYS) "2015 Physician Advocacy Survey - Where are the Doctors?" report. This report is based on a survey of hospitals and practice managers across the state and documents a shortage of physicians in New York. According to this report the reasons for the primary care shortage included:

- an aging primary care workforce
- medical school debt
- fewer residents choosing primary care (lower salary)
- lack of interest in practicing in under-served areas of the state ²

This gap has been a continuous trend since 2009 when "HANYS members reported a dramatic increase in the number of departing physicians and severe difficulty in recruiting replacements."³

Culture and Language Gaps

Facilities reported that they are currently in need of a bilingual workforce. There is an increasing demand for Spanish speaking staff and interpreter or translators to adequately assist and educate patients in navigate the healthcare system.

As reported in organizational assessments, there is also a need for cultural competency training. Recommendations are needed on how to work with diverse populations such as Seneca, Amish, Mennonite, and refugee groups and understand their medical practices and beliefs.

Job Titles – Gaps in Definitions

During the data collection process, partner facilities struggled to synchronize their current staff titles with the New York State Department of Health job titles. When facilities were not certain on how to classify their staff, they would choose to report such employees in the "Other" category. Lack of clear definitions of the Department of Health job titles and requirements for each position has affected the accuracy of the data reported. For example, one facility may employ a Community Health Worker where another facility refers to the same position as a Patient Navigator. Having clear definitions of job titles and requirements would have minimized inaccuracies. This is a top priority for the Millennium Training Strategy subcommittee.

Communication Gaps

A number of facilities reported feeling that there was a lack of down-channeled communication from the PPS. Accordingly, the information and feedback gathered during the season of Organizational Assessments stated facilities had unanswered questions, unclear direction, and a general sense of uncertainty about what the next steps would be under the terms of their involvement in their respective DSRIP project.

Anticipated Gaps

In many cases the partnering facilities were unable to answer questions concerning anticipated staff retraining, redeployment, and recruitment due to being in the early phases of the DSRIP project roll-out. However, most facilities did not report an anticipated need to redeploy or retrain their staff since the majority are currently understaffed. As DSRIP projects further develop, it is anticipated that the need for new hires and the healthcare workforce shortages will continue to increase, especially in rural areas. With the development of new technologies, it is expected that telemedicine will play a major role in providing care to geographically isolated patients in light of these staffing shortages. As previously mentioned, the need for specialists, primary care providers, and nursing staff will continue to increase.

Conclusion and Recommendations

To date, Western New York Rural Area Health Education Center (WNY R-AHEC) has gathered a tremendous amount of data on the current state of the workforce from 125 Millennium-partnered facilities in Western New York. By way of interviews, submitted surveys, face-to-face needs assessments, and developed reports, the attached documentation has been generated to highlight the evident workforce needs of these partners. Moving forward, strategic consideration should be made to each of the current gaps to ensure the full success of DSRIP partners within the PPS.

Shortages – Workforce Gaps

The first gap to be addressed is shortages (gaps in the workforce) and needs to be tackled with a regional approach. For instance, a shortage of dependable and qualified nurses in a primarily rural county (such as Chautauqua County) would not necessarily be approached in the same manner as a nursing shortage in a primarily urban county (such as Erie County). Looking further into this example, it was reported that the nursing shortage in Chautauqua County can largely be attributed to a high turnover rate within the entry-level workforce. It was stated during organizational assessments that much of this turnover was due to a lack of a strong work ethic and professional skills. To address this issue, it is recommended that nurses in the region attend Professionalism trainings to equip them with essential professional skills and a positive work ethic. In contrast, the nursing shortage in Erie County, which is comprised primarily of urban communities, can also be attributed to retainability issues but for different reasons. In this case, retainability is due to smaller offices competing with the benefit packages of large hospitals. For smaller facilities to address this challenge they need to find ways to incentivize their nursing staff to remain in the region by offering other perks such as free or reduce childcare, mileage reimbursement for long commutes, housing options, extra personal time off, or quality training opportunities.

The shortage of physicians, especially in rural area, has been clearly documented. Therefore, using incentives to recruit and retain physicians is crucial. For example, Stay Bonuses offer a financial reward for physicians or employees who work for a practice for a given period of time. Additionally, a facility could offer other long-term compensation incentives such as Deferred Compensation plans. Many smaller facilities cannot bill enough to justify lucrative pay packages, therefore, they can look for assistance from agencies such as the National Health Service Corps which provides incentives including loan repayment for doctors willing to practice in underserved regions. Other packages can be offered such as extended vacation time (with coverage) or limited weekend or on-call time.

Opportunities also exist to provide internships for nurses displaced from acute care settings in primary care. It is a way to incorporate education for nurses who may want to align with a different health care model, and retool for another option within the healthcare continuum.

Culture and Language Gaps

The next gap noted in the evaluation process is cultural and language gaps. While it may be nearly impossible to anticipate and address every language need that partner facilities may have, small steps can be taken to help ensure the bilingual patient experience and level of care received is high quality. In communities where large populations of Spanish-speaking people receive care, providing staff with basic Spanish comprehension and speaking skills could drastically increase the continuity and quality of care. Where offering full translation services may not be an option, equipping staff with these basic comprehension skills could bridge some of the gap between healthcare providers and members of these communities.

In addition to language barriers, healthcare workers in WNY serve members of many indigenous cultures that are found in rural counties. An example of this would be a Community Health Worker going into a neighborhood to work with members of an Amish community or a Seneca tribe. In any situation, when working with various cultures, healthcare workers must be fully educated on the cultural beliefs of the individuals they are serving. Healthcare providers who are culturally and linguistically competent are able to incorporate their patients' traditions and personal views successfully into effective plans of care. When care balances a patient's traditions with Western medicine, patients feel supported, respected, more satisfied with care, and may be more likely to continue with the treatment plan. Healthcare workers are in need of Cultural Competency/Cultural Awareness trainings in order to recognize cultural behaviors and beliefs, sustain effective relationships with clients, and adapt to cross-cultural situations.

Job Titles – Gaps in Definitions

Moving forward, a clear understanding of DSRIP program goals and outcomes across all partners will be crucial. Due to the lack of clear-cut definitions, standardizing DSRIP job titles and descriptions are necessary to ensure uniformity and accuracy in reporting. As previously mentioned, many facilities were not provided with adequate guidance on how to structure and categorize their employees into the NYS developed job titles list. Without such a list, many simply grouped masses of employees into an "Other" category. If a redesign of job title categories is not an option, education and guidance to clarify disparities in understanding is needed to ensure more unified data reporting by partner facilities. This is a top priority for the Millennium Training Strategy subcommittee.

Communication Gaps

The suggestion and request for a DSRIP partner "Summit" is frequently noted during communication with the partners. Many administrators, HR directors, staff trainers, and providers are looking to network and mutually learn from their cohorts. This can be effectively approached by way of holding gatherings to encourage regional cohesion and esprit de corps among DSRIP partners. Face-to-face gatherings, coupled with spirited program updates from Project Managers, ensures partners hold a firm understanding of their role in the program, especially for those who serve in geographically isolated regions.

RESOURCES ROADMAP

PREPARED BY WNY R-AHEC SEPTEMBER 2016

Millennium Collaborative Care Gap Analysis 58 | P a g e

2ai - Integrated Delivery Systems (IDS)

Project Manager: Janet Stoeckl

- Create IDSs that are focused on evidence-based medicine population health management
- Marries medical, behavioral health, post-acute, long term care, and social service orgs.

Name of Trainings	Warm Transfers/ Care Coordination Community Health Worker (CHW) Behavioral Health Integration Health Homes Motivational Interviewing PAM (Patient Activation Measures) CNA (Certified Nursing Assistant) training ED Care Triage
	VBP (Value Based Payment) PCMH (Patient Center Medical Home) MU (Meaningful Use)
Who is conducting the trainings, and where is it being delivered (Manpower, Methods)	In person at provider site On-Line HWAPPS PPS
Funding Source Impacted Staff	PPS, and or provider PCA I & II (through licensed home care agencies) Nurse Managers Social Workers Administrative Staff QA Administrators
Type of Facility	Hospitals, Skilled Nursing Facilities, Certified Home Health Agencies, Primary Care Offices
Metrics	The project is being measured by quarterly reports and analysis of the surveys (Compensation and Benefit, Current Workforce, Workforce Budget Collection). Organizational assessments are also another resource used to determine the needs of the agencies. Assist in facilitation meetings with the Workforce Work Group to review milestones and tasks to achieve each milestone.

2biii - ED Care Triage

Project Manager: Annie Deaver

• Development of co-located primary care services in Emergency Department

Name of Trainings	Cultural Competency(Developmental Disability)
	Health Literacy (CCHL)
	Value Based Payment (VBP Bootcamps)
	HEALTHeLINK Utilization
Who is conducting the trainings,	CCHL- Webinar via HWAPPS
and where is it being delivered (Manpower, Methods)	VBP- In-person training with be given by Millennium for internal staff and external providers (VBP)
	HEALTHELINK has training services available, provider to arrange in house trainings by HEALTHELINK
Funding Source	CCHL- PPS
	VBP- PPS
	HEALTHELINK is free to all participating providers
Impacted Staff	CCHL- Aid Staff (nursing assistants), LPN's, RN's Social Workers, Rehab. Patient Navigators (PN)
	Community Health Workers (CHW)
	VBP- Administration, Management
	HEALTHELINK- RN's, Discharge Planners, Admission Coordinators,
	Management, Social Work, Administration, Rehab. Therapists
Type of Facility	CCHL- Skilled Nursing Facilities, Certified Home Health Care Agencies VBP- Skilled Nursing Facilities, Certified Home Health Agencies
	Hospital Sites
Metrics	The project is being measured by quarterly reports and analysis of the surveys (Compensation and Benefit, Current Workforce, Workforce Budget Collection). Organizational assessments are also another resource used to determine the needs of the agencies. Assist in facilitation meetings with the Workforce Work Group to review
	milestones and tasks to achieve each milestone.

<u> 2bvii - INTERACT</u>

- Skilled Nursing Facility (SNF) will implement Interventions to Reduce Acute Care Transfers (INTERACT) toolkit.
- Reduce the number of patients transferred to acute care facilities

Name of Trainings	INTERACT (Interventions to Reduce Acute Care Transfers)
Who is conducting the trainings, and where is it being delivered (Manpower, Methods)	 Trainings are being offered in person at each provider site by Millennium Staff/ and or private trainer who is hired by the provider. Training is also available via webinar format in You Tube link. Millennium will be looking into utilizing HWAPPS program to provide on-going trainings to provider sites.
Funding Source	PPS/ and or provider
Impacted Staff	Aid Staff (nursing assistants), LPN's, RN's Social Workers, Rehabilitation Therapists, Administrators, Management
Type of Facility	Skilled Nursing Facilities Certified Home Health Care Agencies
Metrics	The project is being measured by quarterly reports and analysis of the surveys (Compensation and Benefit, Current Workforce, Workforce Budget Collection). Organizational assessments are also another resource used to determine the needs of the agencies. Assist in facilitation meetings with the Workforce Work Group to review milestones and tasks to achieve each milestone.

2bviii - Hospital/Home Care

- Hospital & Home Care collaboration implementation of INTERACT-like program in the home care setting.
- Reduce risk of re-hospitalization for high-risk patients
- Gives support to patients released to home instead of SNF; paired with transition care

Name of Trainings	Training on moving from a paper-based system to an EMR-based system and HIE/EMR Training (Health Information Exchange/Electronic Medical Record) INTERACT training for all direct care staff Data tracking training for all staff responsible for data collection, submission, and reporting MLTC (Managed Long Term Care)/Health Home education and training for ED's and discharge planners/social workers
Who is conducting the trainings, and where is it being delivered (Manpower, Methods)	In-Person at provider site On-Line INTERACT-Trainings are being offered in person at each provider site by Millennium Staff/ and or private trainer who is hired by the provider.
Funding Source	PPS, and or provider
Impacted Staff	CHW (Certified Health Worker)
	Home Health Aid's Social Workers
Type of Facility	Home Health Care Facilities Hospitals Skilled Nursing Facility (when patient is being transferred back home)
Metrics	The project is being measured by quarterly reports and analysis of the surveys (Compensation and Benefit, Current Workforce, Workforce Budget Collection). Organizational assessments are also another resource used to determine the needs of the agencies. Assist in facilitation meetings with the Workforce Work Group to review milestones and tasks to achieve each milestone.

2di - PAM (Patient Activation Measures)

Patient activation is a key concept which refers to people's willingness and capacity to take on the role of managing their own health and health care.

- Engage, educate, and integrate the uninsured and low/non-utilizing Medicaid population into community-based care
- Focus on increasing patient-use of primary & preventive services by increasing resources

Name of Trainings	Cultural Competency (Seneca's, Amish) Leadership Skills / Management Skills "PAM Branding"-universal image to unify CHW's to PAM Communication: Professional vs Layperson / Medical Terminology Negotiation Skills Emotional Intelligence Project Management Training Motivational Interviewing Data Analytics
Who is conducting the trainings, and where is it being delivered (Manpower, Methods)	CBO's can deliver PAM through community outreach PPS training team (expertise specifically in patient and engagement) In-person training at provider site On-Line
Funding Source	PPS, and or provider
Impacted Staff	Project Managers CHW
Type of Facility	Primary and Preventative Care Offices Community Behavioral Health Facilities Certified Home Health Care Agencies
Metrics	The project is being measured by quarterly reports and analysis of the surveys (Compensation and Benefit, Current Workforce, Workforce Budget Collection). Organizational assessments are also another resource used to determine the needs of the agencies. Assist in facilitation meetings with the Workforce Work Group to review milestones and tasks to achieve each milestone.

<u>3ai - Behavioral Health Integration</u>

• Integration of mental health and substance abuse primary care services to ensure coordination of care for both services

Name of Trainings	EMR Training Behavioral Health Integration Social/Clinical Assess. Skills (within DD pop.) Care/Diagnosis of persons with DD for ED staff Dealing with dual diagnosis (BH & MH) patients CHW Certifications
	Care Coordination (BH→PCP) Motivational Interviewing Cultural Competency /Sensitivity (working with DD pop.)
	Compliance Trainings / HIPPA Training for substance abuse assess./screenings/forms
Who is conducting the trainings, and where is it being delivered (Manpower, Methods)	Training can be offered in person or on-line at provider sites Trainings can be delivered through the PPS or an outside agency HWAPPS
Funding Source	PPS , Provider, DOH
Impacted Staff	LCSW's Mental Health Specialists Bilingual staff / Translators LPNs/RNs Nurse Practitioners - Psychiatric Psychiatrists / Psychologists Family Support Coordinators / Direct Support Specialists
Type of Facility	Community Behavioral Health Facilities Emergency Departments Health Homes
Metrics	The project is being measured by quarterly reports and analysis of the surveys (Compensation and Benefit, Current Workforce, Workforce Budget Collection). Organizational assessments are also another resource used to determine the needs of the agencies. Assist in facilitation meetings with the Workforce Work Group to review milestones and tasks to achieve each milestone.

<u> 3aii - Crisis Stabilization</u>

- Provide readily accessible behavioral health (BH) crisis services that allow access to appropriate level of service and providers, supporting a rapid de-escalation of the crisis
- Provide a safe location for observing & monitoring BH patients by ED and community service providers

Name of Trainings	Whole Person Treatment
, i i i i i i i i i i i i i i i i i i i	Cultural Competency
	Integration of Services
	Mental Health Triage Scale
	Law Enforcement
Who is conducting the trainings, and where	Training can be offered in person or on-line at provider sites
is it being delivered (Manpower, Methods)	Trainings can be delivered through the PPS or an outside agency
	from the provider
Funding Source	PPS, Provider, DOH, OASAS
Impacted Staff	Crisis Integration Team Coordinator
	Licensed Social Worker
	Outreach Coordinator/workers
	Hotline crisis call workers
	Police officers
	Prevention Professionals
Type of Facility	Community Behavioral Health Facilities
	Emergency Departments
	Health Homes
Metrics	The project is being measured by quarterly reports and analysis
	of the surveys (Compensation and Benefit, Current Workforce,
	Workforce Budget Collection). Organizational assessments are
	also another resource used to determine the needs of the
	agencies. Assist in facilitation meetings with the Workforce
	Work Group to review milestones and tasks to achieve each
	milestone.

3bi - Cardiovascular Disease (CVD)

Engage network practitioners in the prevention and management of CVD using the American Heart Association's Million Hearts Program

• Ensure clinics use evidence-based strategies to improve management of CVD

N (T))	
Name of Trainings	Cultural Competency
	Million Heart Trainings
	Cholesterol Management
	Blood Pressure Technique for Office Training
	Life Style Self-Management Goals
	PCMH (Patient Centered Home Medical)
	Smoking cessation
	Use of 5 A's of tobacco (Ask, Assess, Advise, Assist, Arrange)
Who is conducting the trainings, and where	Training can be offered in person or on-line at provider sites
is it being delivered (Manpower, Methods)	Trainings can be delivered through the PPS or an outside
	agency from the provider
	HWAPPS
Impacted Staff	Primary Care based Training and mid-levels (PCPs)
	Community Health Workers or Care Coordinators
	PCMH Facilitators
	Practice Engagement Facilitators
Type of Facility	Clinical Practices in the community
	Ambulatory Care Centers
	,
Metrics	The project is being measured by quarterly reports and
	analysis of the surveys (Compensation and Benefit, Current
	Workforce, Workforce Budget Collection). Organizational
	assessments are also another resource used to determine the
	needs of the agencies. Assist in facilitation meetings with the
	Workforce Work Group to review milestones and tasks to
	achieve each milestone.

3fi - Maternal and Child Health

- Increase support programs for maternal & child health (including high-risk pregnancies)
- Reduce avoidable poor pregnancy outcomes and hospitalizations
- Improve maternal and child health through first 2 years of life

Name of Trainings	Cultural Competency/Diversity
	Expectations of the project
	Computer Skills
	Data Analytics
	Community Interaction/Safety Skills
	People with experience to talk about what works and what doesn't
	Community Awareness/Safety
Who is conducting the trainings, and	Training can be offered in person or on-line at provider sites
where is it being delivered (Manpower,	Trainings can be delivered through the PPS or an outside agency
Methods)	from the provider
Funding Source	PPS, and or provider
Impacted Staff	RNs
	CHWs
	CHW Supervisors
Type of Facility	OB/GYN Practices
	Primary Care Offices
Metrics	The project is being measured by quarterly reports and analysis
	of the surveys (Compensation and Benefit, Current Workforce,
	Workforce Budget Collection). Organizational assessments are
	also another resource used to determine the needs of the
	agencies. Assist in facilitation meetings with the Workforce
	Work Group to review milestones and tasks to achieve each
	milestone.
	micstone.

4ai - Mental, Emotional, Behavioral (MEB) Well-Being

• Provide education & intervention programs to promote MEB well-being

Name of Trainings	Mental Health First Aid Cultural Diversity Language Skills Cultural Competency Prevention Ethics Substance Abuse Prevention Skills Training (SAPST)
Who is conducting the trainings, and where is it being delivered (Manpower, Methods)	Training can be offered in person or on-line at provider sites Trainings can be delivered through the PPS or an outside agency from the provider
Funding Source	PPS, Provider, OASAS
Impacted Staff	Prevention Specialist (NY OASYS Cert.) Bilingual skilled employees Licensed Social Worker Nursing Staff
Type of Facility	Community Behavioral Health Facilities Emergency Room Departments
Metrics	The project is being measured by quarterly reports and analysis of the surveys (Compensation and Benefit, Current Workforce, Workforce Budget Collection). Organizational assessments are also another resource used to determine the needs of the agencies. Assist in facilitation meetings with the Workforce Work Group to review milestones and tasks to achieve each milestone.

4di - Reduce Premature Births

Reduce premature births from 12% to goal of 10.2%

• Counseling for tobacco use, enhance social support for high risk pregnancies, provide clinic management and home health care for pregnant mothers

Name of Trainings	Cultural Competency Organizational Leadership Use of 5 A's of tobacco (Ask, Assess, Advise, Assist, Arrange)
	Training for substance abuse assess./screenings/forms
Who is conducting the trainings, and	Classroom group setting (In-person)
where is it being delivered (Manpower,	On-line
Methods)	The trainings will be provided by the PPS or hired outside by the provider.
Funding Source	PPS, and or provider
Impacted Staff	Program Directors
	High-risk Coordinators
	Care Coordinators
	CHW s
	CHW supervisors
	Administrative Assistant
	Doula
Type of Facility	Hospitals
	Obstetrics and Gynecology practices
Metrics	The project is being measured by quarterly reports and
	analysis of the surveys (Compensation and Benefit, Current
	Workforce, Workforce Budget Collection). Organizational
	assessments are also another resource used to determine the
	needs of the agencies. Assist in facilitation meetings with the
	Workforce Work Group to review milestones and tasks to
	achieve each milestone.
