

Teen Sexual Health

1 IN 3 TEENS

have sex before they graduate high school.

UNDER AGE 18?

You can get tested & treated for STIs, including HIV without parent or guardian consent.

2 IN 5 TEENS

did not use a condom the last time they had sex.

CONDOM + BIRTH CONTROL

is the best way to reduce your risk of STIs, including HIV, and unintended pregnancy.

33,000 STIs AMONG TEENS

were reported in New York State in 2017.

STI and HIV prevention is just one part of your sexual health.

TALK with your partner about sex & consent.

LEARN how to use & where to get condoms & birth control.

THINK about what sexual health means to you.

TALK to a medical provider about your health & testing for STIs & HIV.
