RE: SPA #18-0045
Non-Institutional Services

Dear Mr. Melendez:

The State requests approval of the enclosed amendment #18-0045 to the Title XIX (Medicaid) State Plan for non-institutional services to be effective April 1, 2018 (Appendix I). This amendment is being submitted based on enacted legislation. A summary of the plan amendment is provided in Appendix II.

The State of New York reimburses these services through the use of rates that are consistent with and promote efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available under the plan at least to the extent that such care and services are available to the general population in the geographic area as required by §1902(a)(30) of the Social Security Act and 42 CFR §447.204.

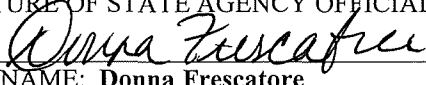

Copies of pertinent sections of enacted legislation are enclosed for your information (Appendix III). A copy of the public notice of this plan amendment, which was given in the New York State Register on March 28, 2018 is also enclosed for your information (Appendix IV). In addition, responses to the five standard funding questions are also enclosed (Appendix V).

If you have any questions regarding this State Plan Amendment submission, please do not hesitate to contact Regina Deyette, Medicaid State Plan Coordinator, Division of Finance and Rate Setting, Office of Health Insurance Programs at (518) 473-3658.

Sincerely,

Donna Frescatore
Medicaid Director
Office of Health Insurance Programs

Public Notice**

MISCELLANEOUS NOTICES/HEARINGS

Notice of Abandoned Property Received by the State Comptroller

Pursuant to provisions of the Abandoned Property Law and related laws, the Office of the State Comptroller receives unclaimed monies and other property deemed abandoned. A list of the names and last known addresses of the entitled owners of this abandoned property is maintained by the office in accordance with Section 1401 of the Abandoned Property Law. Interested parties may inquire if they appear on the Abandoned Property Listing by contacting the Office of Unclaimed Funds, Monday through Friday from 8:00 a.m. to 4:30 p.m., at:

1-800-221-9311
or visit our web site at:
www.osc.state.ny.us

Claims for abandoned property must be filed with the New York State Comptroller's Office of Unclaimed Funds as provided in Section 1406 of the Abandoned Property Law. For further information contact: Office of the State Comptroller, Office of Unclaimed Funds, 110 State St., Albany, NY 12236.

PUBLIC NOTICE Department of Health

Pursuant to 42 CFR Section 447.205, the Department of Health hereby gives public notice of the following:

The Department of Health proposes to amend the Title XIX (Medicaid) State Plan for non-institutional, institutional and long-term care services to comply with proposed statutory provisions. The following changes are proposed:

Non-Institutional Services

Effective on or after April 1, 2018, this initiative proposes to eliminate the supplemental medical assistance payments of \$6 million annually made to providers of emergency medical transportation.

The estimated annual net aggregate decrease in gross Medicaid expenditures attributable to this initiative contained in the budget for state fiscal year 2018/2019 is \$6 million.

Effective on or after April 1, 2018, the professional dispensing fee for brand name, generic, and OTC covered outpatient drugs will be updated to \$10.08, to align with current costs.

The estimated annual aggregate increase in gross Medicaid expenditures attributable to this initiative for state fiscal year 2018/2019 is \$795,531.

Effective on and after October 1, 2018, Medicaid will cover ABAs. ABAs are State Education Department (SED) licensed practitioners who provide intensive treatment for persons diagnosed with autism spectrum disorder using applied behavioral analysis treatment modalities. These services and practitioners are currently covered by Early Intervention (EI), Child Health Plus (CHIP), and all major commercial payers. The Medicaid Program does not currently recognize or reimburse ABA's, which results in a break in coverage for those children who age out of the EI program.

The estimated annual net aggregate increase in gross Medicaid expenditures attributable to this initiative contained in the budget for state fiscal year 2018/2019 is \$12.1 million.

Effective on and after July 1, 2018, the physical therapy cap under both fee-for-service and mainstream managed care will be increased from 20 visits to 40 visits per member in a 12-month period. The following populations are exempt from the 40-visit limitation: children (0-21 years of age); individuals with developmental disabilities; Medicare/Medicaid dually eligible individuals when the service is

covered by Medicare; and individuals with a traumatic brain injury. Revision of the physical therapy cap will provide members an opportunity to obtain additional rehabilitation therapy to treat low back pain as well as other physical conditions which will help reduce the need for opioid treatment.

The estimated annual net aggregate increase in gross Medicaid expenditures attributable to this initiative contained in the budget for state fiscal year 2018/2019 is \$4.6 million.

Effective on and after April 1, 2018, Medicaid will begin covering Centers for Disease Control (CDC) certified National Diabetes Prevention Program (NDPP). The NDPP is a CDC recognized educational and support program designed to assist at-risk individuals from developing Type 2 diabetes. The program focuses on lifestyle interventions and the long-term effects of diet and exercise. These intense interventions demonstrate a greater influence on the reduction in diabetes risk, return to normoglycemia, and weight loss than less intense programs.

The estimated annual net aggregate increase in gross Medicaid expenditures attributable to this initiative contained in the budget for state fiscal year 2018/2019 is \$1.03 million.

Effective on or after April 1, 2018, the Early Intervention Program reimbursement methodology for the targeted case management (service coordination) services will be revised from an hourly rate billed in fifteen-minute units to two separate categories of fixed rates for initial case management services and one per member per month fixed rate for ongoing case management services. These rates are being revised to create administrative efficiencies for billing providers and adjust for administrative activities assumed by providers in direct billing to third party payers through a state fiscal agent established April 1, 2013. These revisions will make the State Plan content and format consistent with Medicaid requirements for case management.

Initial service coordination services not followed by an Individualized Family Service Plan meeting will have a minimum base of two hours with no cap; those followed by an Individualized Family Service Plan meeting will have a minimum base of three hours with no cap. Ongoing service coordination services will have a minimum base of 1.25 hours per month. Rates for case management will be set prospectively and will cover labor, administrative overhead, general operating and capital costs, and regional cost differences.

There is no additional estimated annual change to gross Medicaid expenditures as a result of the proposed amendments.

Effective on or after April 1, 2018, this proposal is to establish a ten percent rate increase to the Hospice Residence rates, set a benchmark rate and include specialty rates in the weighted average rate calculation. The proposal would increase Medicaid Hospice Residence rates to help cover current costs and avoid closure of Hospice Residence programs.

The estimated annual net aggregate increase in gross Medicaid expenditures attributable to this initiative contained in the budget for state fiscal year 2018/2019 is \$1.7 million.

Effective on or after April 1, 2018, continues the supplemental upper payment limit payments made to general hospitals, other than major public general hospitals under non-institutional services of \$339 million annually.

For state fiscal year beginning April 1, 2018 through March 31, 2019, continues hospital outpatient payment adjustments that increase the operating cost components of rates of payment for hospital outpatient and emergency departments on and after April 1, 2011, for public general hospitals other than those operated by the State of New York or the State University of New York, which are located in a city with a population of over one million. The amount to be paid will be up to \$287 million annually based on criteria and methodology set by the Commissioner of Health, which the Commissioner may periodically set through a memorandum of understanding with the New York City Health and Hospitals Corporation. Such adjustments shall be paid by means of one or more estimated payments. Payments may be added to rates of payment or made as aggregate payments.

For the state fiscal year beginning April 1, 2018 through March 31, 2019, continues upon the election of the social services district in

which an eligible diagnostic and treatment center (DTC) is physically located, up to \$12.6 million in additional annual Medicaid payments may be paid to public DTCs operated by the New York City Health and Hospitals Corporation. Such payments will be based on each DTC's proportionate share of the sum of all clinic visits for all facilities eligible for an adjustment for the base year two years prior to the rate year. The proportionate share payments may be added to rates of payment or made as aggregate payments to eligible DTCs.

For the state fiscal year beginning April 1, 2018 through March 31, 2019, continues up to \$5.4 million in additional annual Medicaid payments may be paid to county operated free-standing clinics, not including facilities operated by the New York City Health and Hospitals Corporation, for services provided by such DTC and those provided by a county operated freestanding mental health or substance abuse DTC. Distributions shall be based on each eligible facility's proportionate share of the sum of all DTC and clinic visits for all eligible facilities receiving payments for the base year two years prior to the rate year. The proportionate share payments may be added to rates of payment or made as aggregate payments to eligible facilities.

Effective on or after April 1, 2018, The Department of Health proposes to amend the Public Health Law § 3001, create new Public Health Law § § 2805-z and 3001-a, and amend the Social Services Law § 365-a to permit health care providers to collaborate on community paramedicine programs that allow emergency medical personnel to provide care within their certification, training and experience in residential settings.

The annual increase in gross Medicaid expenditures attributable to this initiative contained in the budget for state fiscal year 2018/2019 is \$2.3 million.

Institutional Services

Effective on or after April 1, 2018, the commissioner shall convene a temporary workgroup comprised of representatives of hospitals and residential nursing facilities, as well as representatives from the department, to develop recommendations for streamlining the capital reimbursement methodology to achieve a one-percent reduction in capital expenditures to hospitals and residential nursing facilities, including associated specialty and adult day health care units. Pending the development of the workgroup's recommendations and the implementation of any such recommendations accepted by the commissioner, the commissioner shall be authorized to reduce the overall amount of capital reimbursement as necessary to achieve a one-percent reduction in capital expenditures beginning with State fiscal year 2018/2019.

The annual decrease in gross Medicaid expenditures attributable to this initiative contained in the budget for state fiscal year 2018/2019 is \$13.4 million.

Effective on or after April 1, 2018, continues the supplemental upper payment limit payments made to general hospitals, other than major public general hospitals under institutional services of \$339 million annually.

For the state fiscal year beginning April 1, 2018 through March 31, 2019, continues specialty hospital adjustments for hospital inpatient services provided on and after April 1, 2012, to public general hospitals, other than those operated by the State of New York or the State University of New York, located in a city with a population of over one million and receiving reimbursement of up to \$1.08 billion annually based on criteria and methodology set by the Commissioner of Health, which the Commissioner may periodically set through a memorandum of understanding with the New York City Health and Hospitals Corporation. Such adjustments shall be paid by means of one or more estimated payments. Payments to eligible public general hospitals may be added to rates of payment or made as aggregate payments.

Effective on or after April 1, 2018, payments to hospitals that meet the criteria as an enhanced safety net hospital, the criteria is as follows: In any of the previous three calendar years has had not less than fifty percent of the patients it treats receive Medicaid or are medically uninsured; not less than forty percent of its inpatient discharges are covered by Medicaid; twenty-five percent or less of its discharged patients are commercially insured; not less than three percent of the

2018 Title XIX State Plan
Second Quarter Amendment
Responses to Standard Funding Questions

NON-INSTITUTIONAL SERVICES
State Plan Amendment #18-0045

CMS Standard Funding Questions

The following questions are being asked and should be answered in relation to all payments made to all providers reimbursed pursuant to a methodology described in Attachment 4.19-B of the state plan. For SPAs that provide for changes to payments for clinic or outpatient hospital services or for enhanced or supplemental payments to physician or other practitioners, the questions must be answered for all payments made under the state plan for such service.

- 1. Section 1903(a)(1) provides that Federal matching funds are only available for expenditures made by States for services under the approved State plan. Do providers receive and retain the total Medicaid expenditures claimed by the State (includes normal per diem, supplemental, enhanced payments, other) or is any portion of the payments returned to the State, local governmental entity, or any other intermediary organization? If providers are required to return any portion of payments, please provide a full description of the repayment process. Include in your response a full description of the methodology for the return of any of the payments, a complete listing of providers that return a portion of their payments, the amount or percentage of payments that are returned and the disposition and use of the funds once they are returned to the State (i.e., general fund, medical services account, etc.).**

Response: Providers do retain the payments made pursuant to this amendment. However, this requirement in no way prohibits the public provider, including county providers, from reimbursing the sponsoring local government for appropriate expenses incurred by the local government on behalf of the public provider. The State does not regulate the financial relationships that exist between public health care providers and their sponsoring governments, which are extremely varied and complex. Local governments may provide direct and/or indirect monetary subsidies to their public providers to cover on-going unreimbursed operational expenses and assure achievement of their mission as primary safety net providers. Examples of appropriate expenses may include payments to the local government which include reimbursement for debt service paid on a provider's behalf, reimbursement for Medicare Part B premiums paid for a provider's retirees, reimbursement for contractually required health benefit fund payments made on a provider's behalf, and payment for overhead expenses as allocated per federal Office of Management and Budget Circular 2 CFR 200 regarding Cost Principles for State, Local, and Indian Tribal Governments. The existence of such transfers should in no way negate the legitimacy of these facilities' Medicaid payments or result in reduced Medicaid federal financial participation for the State. This position was further supported by CMS in review and approval of SPA 07-07C when an on-site audit of these transactions for New York City's Health and Hospitals Corporation was completed with satisfactory results.

2. **Section 1902(a)(2) provides that the lack of adequate funds from local sources will not result in lowering the amount, duration, scope, or quality of care and services available under the plan. Please describe how the state share of each type of Medicaid payment (normal per diem, supplemental, enhanced, other) is funded. Please describe whether the state share is from appropriations from the legislature to the Medicaid agency, through intergovernmental transfer agreements (IGTs), certified public expenditures (CPEs), provider taxes, or any other mechanism used by the state to provide state share. Note that, if the appropriation is not to the Medicaid agency, the source of the state share would necessarily be derived through either through an IGT or CPE. In this case, please identify the agency to which the funds are appropriated. Please provide an estimate of total expenditure and State share amounts for each type of Medicaid payment. If any of the non-federal share is being provided using IGTs or CPEs, please fully describe the matching arrangement including when the state agency receives the transferred amounts from the local governmental entity transferring the funds. If CPEs are used, please describe the methodology used by the state to verify that the total expenditures being certified are eligible for Federal matching funds in accordance with 42 CFR 433.51(b). For any payment funded by CPEs or IGTs, please provide the following:**
- (i) a complete list of the names of entities transferring or certifying funds;**
 - (ii) the operational nature of the entity (state, county, city, other);**
 - (iii) the total amounts transferred or certified by each entity;**
 - (iv) clarify whether the certifying or transferring entity has general taxing authority; and,**
 - (v) whether the certifying or transferring entity received appropriations (identify level of appropriations).**

Response: Payments made to service providers under the provisions of this SPA are funded through a general appropriation received by the State agency that oversees medical assistance (Medicaid), which is the Department of Health. The source of the appropriation is the Medicaid General Fund Local Assistance Account, which is part of the Global Cap. The Global Cap is funded by General Fund and HCRA resources. There have been no new provider taxes and no existing taxes have been modified as a result of this SPA.

3. **Section 1902(a)(30) requires that payments for services be consistent with efficiency, economy, and quality of care. Section 1903(a)(1) provides for Federal financial participation to States for expenditures for services under an approved State plan. If supplemental or enhanced payments are made, please provide the total amount for each type of supplemental or enhanced payment made to each provider type.**

Response: The payments authorized for this provision are not supplemental or enhanced payments.

4. **For clinic or outpatient hospital services please provide a detailed description of the methodology used by the state to estimate the upper payment limit (UPL) for each class of providers (State owned or operated, non-state government owned or operated, and privately owned or operated). Please provide a current (i.e., applicable to the current rate year) UPL demonstration.**

Response: The Department is not aware of any UPL requirement for the Hospice program.

5. **Does any governmental provider receive payments that in the aggregate (normal per diem, supplemental, enhanced, other) exceed their reasonable costs of providing services? If payments exceed the cost of services, do you recoup the excess and return the Federal share of the excess to CMS on the quarterly expenditure report?**

Response: The rate methodology included in the approved state plan for Hospice services is based on Federal rates from the CMS website adjusted by regional wage index factors. We are unaware of any requirement under current federal law or regulation that limits individual provider payments to their actual costs.

ACA Assurances:

1. **Maintenance of Effort (MOE). Under section 1902(gg) of the Social Security Act (the Act), as amended by the Affordable Care Act, as a condition of receiving any Federal payments under the Medicaid program during the MOE period indicated below, the State shall not have in effect any eligibility standards, methodologies, or procedures in its Medicaid program which are more restrictive than such eligibility provisions as in effect in its Medicaid program on March 10, 2010.**

MOE Period.

- **Begins on: March 10, 2010, and**
- **Ends on: The date the Secretary of the Federal Department of Health and Human Services determines an Exchange established by a State under the provisions of section 1311 of the Affordable Care Act is fully operational.**

Response: This SPA complies with the conditions of the MOE provision of section 1902(gg) of the Act for continued funding under the Medicaid program.

2. **Section 1905(y) and (z) of the Act provides for increased FMAPs for expenditures made on or after January 1, 2014 for individuals determined eligible under section 1902(a)(10)(A)(i)(VIII) of the Act. Under section 1905(cc) of the Act, the increased FMAP under sections 1905(y) and (z) would not be available for States that require local political subdivisions to contribute amounts toward the non-Federal share of the State's**

expenditures at a greater percentage than would have been required on December 31, 2009.

Prior to January 1, 2014 States may potentially require contributions by local political subdivisions toward the non-Federal share of the States' expenditures at percentages greater than were required on December 31, 2009. **However**, because of the provisions of section 1905(cc) of the Act, it is important to determine and document/flag any SPAs/State plans which have such greater percentages prior to the January 1, 2014 date in order to anticipate potential violations and/or appropriate corrective actions by the States and the Federal government.

Response: This SPA would [] / would not [✓] violate these provisions, if they remained in effect on or after January 1, 2014.

- 3. Please indicate whether the State is currently in conformance with the requirements of section 1902(a)(37) of the Act regarding prompt payment of claims.**

Response: The State does comply with the requirements of section 1902(a)(37) of the Act regarding prompt payment of claims.

Tribal Assurance:

Section 1902(a)(73) of the Social Security Act the Act requires a State in which one or more Indian Health Programs or Urban Indian Organizations furnish health care services to establish a process for the State Medicaid agency to seek advice on a regular ongoing basis from designees of Indian health programs whether operated by the Indian Health Service HIS Tribes or Tribal organizations under the Indian Self Determination and Education Assistance Act ISDEAA or Urban Indian Organizations under the Indian Health Care Improvement Act.

IHCIA Section 2107(e)(I) of the Act was also amended to apply these requirements to the Children's Health Insurance Program CHIP. Consultation is required concerning Medicaid and CHIP matters having a direct impact on Indian health programs and Urban Indian organizations.

- a) Please describe the process the State uses to seek advice on a regular ongoing basis from federally recognized tribes Indian Health Programs and Urban Indian Organizations on matters related to Medicaid and CHIP programs and for consultation on State Plan Amendments waiver proposals waiver extensions waiver amendments waiver renewals and proposals for demonstration projects prior to submission to CMS.**
- b) Please include information about the frequency inclusiveness and process for seeking such advice.**
- c) Please describe the consultation process that occurred specifically for the development and submission of this State Plan Amendment when it occurred and who was involved.**

Response: Tribal consultation was performed in accordance with the State's tribal consultation policy as approved in SPA 17-0065, and documentation of such is included with this submission. To date, no feedback has been received from any tribal representative in response to the proposed change in this SPA.
