(1) Records are rejected if date of birth and/or date of visit unknown.
(2) Analyses are done based on one record per child, excluding records with unknown data or errors.
(3) Percentages are not calculated if < 100 records are available for analysis.
(4) Rank (i.e. Rk) compares this county's rate to other counties. Rank 1 means the best rate.
(5) Infants born during the reporting period are included in the analysis. Low birthweight is defined as < 2500 grams and high birthweight is defined as > 4000 grams.
(6) 2006 WHO growth chart is used for children under 2 years of age. Short stature is defined as length-for-age <= 2.3rd percentile, Underweight is defined as weight-for-length <= 2.3rd percentile, and high weight-for-length (i.e. Obese) is defined as >= 97.7th percentile.
(7) 2000 CDC growth chart is used for children 2 years of age and older. Short stature is defined as height-for-age < 5th percentile, Underweight is defined as BMI-for-age < 5th percentile, Overweight is defined as BMI-for-age >= 85th to < 95th percentile, and Obese is defined as >= 95th percentile.
(8) 1998 CDC MMWR, Recommendations to Prevent and Control Iron Deficiency in the United States, is used for children 6 months of age and older with altitude adjusted.

Run Date: June 9, 2017

(1) Records are rejected if date of birth and/or date of visit unknown.
(2) Analyses are done based on one record per child, excluding records with unknown data or errors.
(3) Percentages are not calculated if < 100 records are available for analysis.
(4) Rank (i.e. Rk) compares this county's rate to other counties. Rank 1 means the best rate.
(5) Infants born during the reporting period are included in the analysis. Low birthweight is defined as < 2500 grams and high birthweight is defined as > 4000 grams.
(6) 2006 WHO growth chart is used for children under 2 years of age. Short stature is defined as length-for-age <= 2.3rd percentile, Underweight is defined as weight-for-length <= 2.3rd percentile, and high weight-for-length (i.e. Obese) is defined as >= 97.7th percentile.
(7) 2000 CDC growth chart is used for children 2 years of age and older. Short stature is defined as height-for-age < 5th percentile, Underweight is defined as BMI-for-age < 5th percentile, Overweight is defined as BMI-for-age >= 85th to < 95th percentile, and Obese is defined as >= 95th percentile.
(8) 1998 CDC MMWR, Recommendations to Prevent and Control Iron Deficiency in the United States, is used for children 6 months of age and older with altitude adjusted.

Run Date: June 9, 2017

(1) Records are rejected if date of birth and/or date of visit unknown.
(2) Analyses are done based on one record per child, excluding records with unknown data or errors.
(3) Percentages are not calculated if < 100 records are available for analysis.
(4) Rank (i.e. Rk) compares this county's rate to other counties. Rank 1 means the best rate.
(5) Infants born during the reporting period are included in the Ever Breastfed analysis. Infants who turned 6 months of age during the reporting period by/on their date of visit are included in the Breastfed At Least 6 Months analysis. Children who turned 12 months of age during the reporting period by/on their date of visit are included in the Breastfed At Least 12 Months ana lysis.
(6) It is possible the analysis will show that slightly more infants are breastfed at older ages, e.g. 1+ week of age, than at younger ages, e.g. at birth (ever breastfed), due to variation in infants included in each breastfeeding analysis category.
(7) The analysis includes infants who were ever breastfed and who turned that age during the reporting period by/on their date of visit.
(8) Children aged 2 years and older included in the analysis.

(1) Records are rejected if date of birth and/or date of visit unknown.
(2) Analyses are done based on one record per child, excluding records with unknown data or errors.
(3) Percentages are not calculated if < 100 records are available for analysis.
(4) Rank (i.e. Rk) compares this county's rate to other counties. Rank 1 means the best rate.
(5) Infants born during the reporting period are included in the Ever Breastfed analysis. Infants who turned 6 months of age during the reporting period by/on their date of visit are included in the Breastfed At Least 6 Months analysis. Children who turned 12 months of age during the reporting period by/on their date of visit are included in the Breastfed At Least 12 Months ana lysis.
(6) It is possible the analysis will show that slightly more infants are breastfed at older ages, e.g. 1+ week of age, than at younger ages, e.g. at birth (ever breastfed), due to variation in infants included in each breastfeeding analysis category.
(7) The analysis includes infants who were ever breastfed and who turned that age during the reporting period by/on their date of visit.
(8) Children aged 2 years and older included in the analysis.

(1) Records are rejected if date of birth and/or date of visit unknown.
(2) Analyses are done based on one record per child and year, excluding records with unknown data or errors.
(3) Percentages are not calculated if < 100 records are available for analysis.
(4) Rank (i.e. Rk) compares this county's rate to other counties. Rank 1 means the best rate.
(5) Infants born during the reporting period are included in the analysis. Low birthweight is defined as < 2500 grams and high birthweight is defined as > 4000 grams.
(6) 2006 WHO growth chart is used for children under 2 years of age. Short stature is defined as length-for-age <= 2.3rd percentile, Underweight is defined as weight-for-length <= 2.3rd percentile, and high weight-for-length (i.e. Obese) is defined as >= 97.7th percentile.
(7) 2000 CDC growth chart is used for children 2 years of age and older. Short stature is defined as height-for-age < 5th percentile, Underweight is defined as BMI-for-age < 5th percentile, Overweight is defined as BMI-for-age >= 85th to < 95th percentile, and Obese is defined as >= 95th percentile.
(8) 1998 CDC MMWR, Recommendations to Prevent and Control Iron Deficiency in the United States, is used for children 6 months of age and older with altitude adjusted.

(1) Records are rejected if date of birth and/or date of visit unknown.
(2) Analyses are done based on one record per child and year, excluding records with unknown data or errors.
(3) Percentages are not calculated if < 100 records are available for analysis.
(4) Rank (i.e. Rk) compares this county's rate to other counties. Rank 1 means the best rate.
(5) Infants born during the reporting period are included in the analysis. Low birthweight is defined as < 2500 grams and high birthweight is defined as > 4000 grams.
(6) 2006 WHO growth chart is used for children under 2 years of age. Short stature is defined as length-for-age <= 2.3rd percentile, Underweight is defined as weight-for-length <= 2.3rd percentile, and high weight-for-length (i.e. Obese) is defined as >= 97.7th percentile.
(7) 2000 CDC growth chart is used for children 2 years of age and older. Short stature is defined as height-for-age < 5th percentile, Underweight is defined as BMI-for-age < 5th percentile, Overweight is defined as BMI-for-age >= 85th to < 95th percentile, and Obese is defined as >= 95th percentile.
(8) 1998 CDC MMWR, Recommendations to Prevent and Control Iron Deficiency in the United States, is used for children 6 months of age and older with altitude adjusted.

(1) Records are rejected if date of birth and/or date of visit unknown.
(2) Analyses are done based on one record per child and year, excluding records with unknown data or errors.
(3) Percentages are not calculated if < 100 records are available for analysis.
(4) Rank (i.e. Rk) compares this county's rate to other counties. Rank 1 means the best rate.
(5) Infants born during the reporting period are included in the Ever Breastfed analysis. Infants who turned 6 months of age during the reporting period by/on their date of visit included in the Breastfed At Least 6 Months analysis. Children who turned 12 months of age during the reporting period by/on their date of visit included in the Breastfed At Least 12 Months analysis.
(6) It is possible the analysis will show that slightly more infants are breastfed at older ages, e.g. 1+ week of age, than at younger ages, e.g. at birth (ever breastfed), due to variation in infants included in each breastfeeding analysis category.
(7) The analysis includes infants who were ever breastfed and who turned that age during the reporting period by/on their date of visit.
(8) Children aged 2 years and older included in the analysis.

(1) Records are rejected if date of birth and/or date of visit unknown.
(2) Analyses are done based on one record per child and year, excluding records with unknown data or errors.
(3) Percentages are not calculated if < 100 records are available for analysis.
(4) Rank (i.e. Rk) compares this county's rate to other counties. Rank 1 means the best rate.
(5) Infants born during the reporting period are included in the Ever Breastfed analysis. Infants who turned 6 months of age during the reporting period by/on their date of visit included in the Breastfed At Least 6 Months analysis. Children who turned 12 months of age during the reporting period by/on their date of visit included in the Breastfed At Least 12 Months analysis.
(6) It is possible the analysis will show that slightly more infants are breastfed at older ages, e.g. 1+ week of age, than at younger ages, e.g. at birth (ever breastfed), due to variation in infants included in each breastfeeding analysis category.
(7) The analysis includes infants who were ever breastfed and who turned that age during the reporting period by/on their date of visit.
(8) Children aged 2 years and older included in the analysis.
