[^1]2) Analyses are done based on one record per child, excluding records with unknown data or errors.
(3) Percentages are not calculated if $<100$ records are available for analysis
(4) Infants born during the reporting period are included in the analysis. Low birthweight is defined as < 2500 grams and high birthweight is defined as $>4000$ grams.

defined as $>=97.7$ th percentile.

(7) 1098 entile, and Obese is defined as $>=95$ th percentile.
(7) 1998 CDC MMWR, Recommendations to Prevent and Control Iron Deficiency in the United States, is used for children 6 months of age and older with altitude adjusted.
