

Naloxone is an emergency medicine that can stop an opioid overdose.

Do you have prescription coverage as part of your health insurance plan? If you do, you can use N-CAP to cover up to \$40 in prescription co-payments so there are no or lower out-of-pocket expenses when getting naloxone at a participating pharmacy.

Many New York State pharmacies provide naloxone through a “standing order” that allows you to get these medications without a prescription. To find the nearest registered program or participating pharmacy visit:
